

This image contains vertical bar charts with the title “What climate-related policies do you support?” It contains a header saying, “percentage who support or strongly support each policy.”

The first chart says “use public funding so all residents can afford air conditioning” with 19 percent of White respondents, 46 percent of Black respondents, and 13 percent of other respondents.

The second chart says “provide vulnerable populations with free health services during heat waves” with 34 percent of White respondents, 53 percent of Black respondents, and 39 percent of other respondents.

The third chart says “adopt a text-based early warning system to reduce risks from heat waves” with 39 percent of White respondents, 58 percent of Black respondents, and 43 percent of other respondents.

The fourth chart says “use funding to help residents plant shade trees around their homes” with 51 percent of White respondents, 52 percent of Black respondents, and 51 percent of other respondents.
