

This image contains a horizontal bar graph with the headline “Hoosiers underestimate fellow residents’ acceptance of climate change.” The title of the graph is “Perception gap is greater for respondents who think climate change is happening ‘very little’ or ‘not at all.’”

The first bar is labeled “Percentage of Hoosiers who accept the reality of climate change’ and ends at 80.

The second bar is labeled “Average estimated percentage by respondents who think climate change is happening ‘somewhat’ or ‘to a great extent’” and ends at 60.

The third bar is labeled “Average estimated percentage by respondents who say climate change is happening ‘very little’ or ‘not at all’” and ends at 43.
