

THE HOOSIER LIFE SURVEY STATEWIDE REPORT

What do Indiana residents think about climate change, how are they preparing, and what resilience policies do they support? Results from the Hoosier Life Survey provide answers.

BELIEFS

75%

believe climate change is happening.

34%

believe climate change is entirely or mostly caused by human activities.

11%

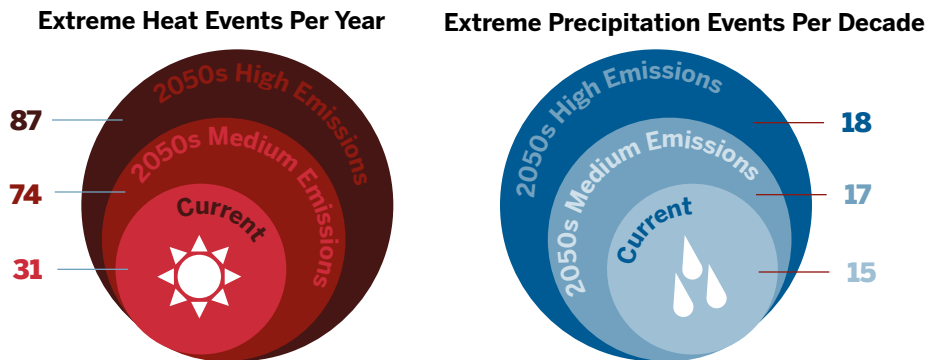

don't know if climate change is happening.

56%

believe most scientists think climate change is happening.

FUTURE IMPACTS

Climate change is projected to bring more high heat days, more extreme precipitation events, and increased flood risks to Indiana.

Source: Hoosier Resilience Index

INFORMATION, TRUST, AND EXPERIENCE

Fifty percent know someone who has suffered health impacts, such as dehydration or heat stroke, from heat waves or have experienced it themselves.

Thirty-five percent trust Indiana scientists "a lot" about how to prepare for climate change.

Twenty-eight percent feel very informed about the risks of extreme weather.

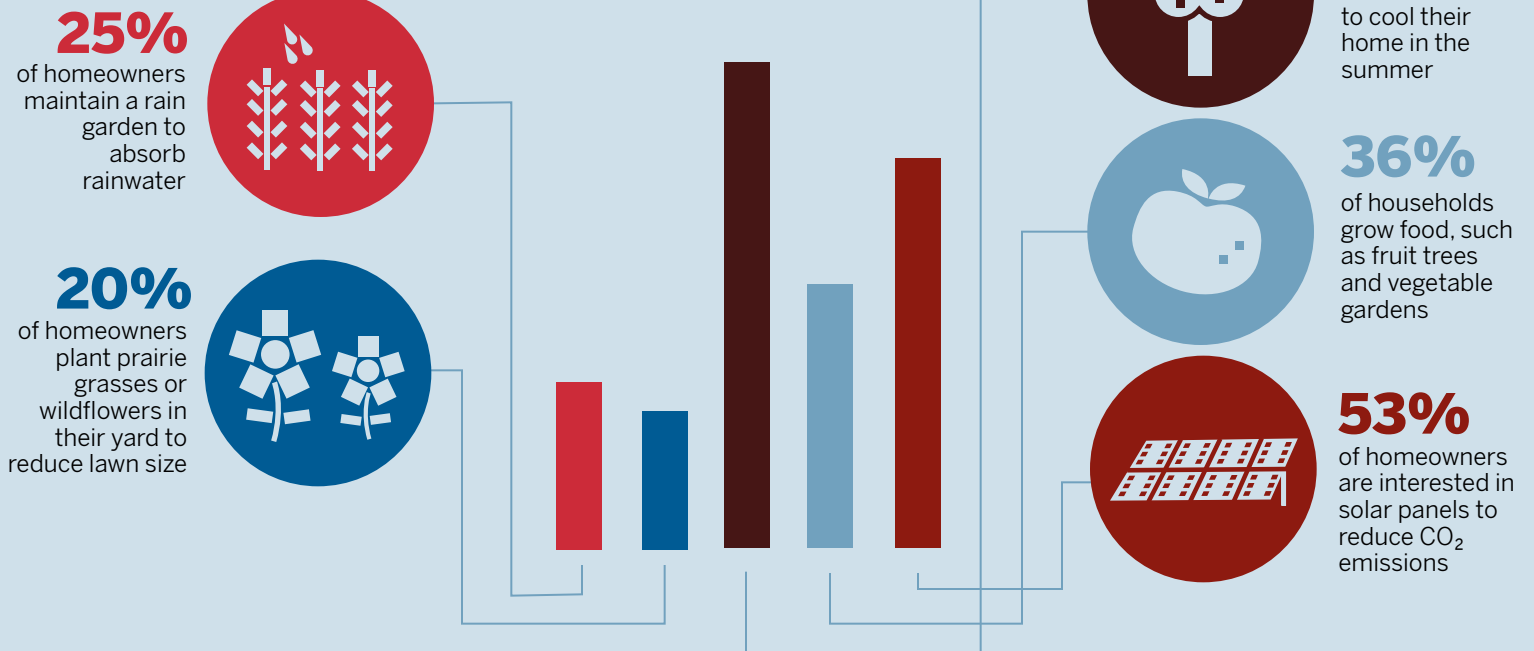

Survey statistics

Composite margin of error: 3.7 percentage point
Confidence level: 95 percent

CLIMATE CHANGE AT HOME

COMMUNITY POLICIES AND PROGRAMS

Indiana residents support a mix of policies and programs to address the short- and long-term impacts of climate change. The most popular proposals to address **heat** and **precipitation** challenges are:

Plant more trees on town streets to reduce impacts of flooding and heat waves **86%**

Adopt a text-based early warning system to reduce risks from heat waves **81%**

Provide vulnerable populations with free health services during heat waves **71%**

80% **Build stronger and higher flood walls where necessary**

78% **Replace some paved areas with water-absorbent landscape**

60% **Construct new transportation routes to reduce the impact of flooding**

ABOUT THE HOOSIER LIFE SURVEY

Conducted between August and December 2019, the Hoosier Life Survey captures how Indiana residents perceive environmental changes, how residents are being affected in their homes and communities, how Hoosiers are preparing, and what they expect in the future. For more about the survey go to go.iu.edu/31Mf.

Looking for more results? Complete survey responses for the state and other Indiana metro areas are available on the Hoosier Life Survey Metropolitan Report web page (go.iu.edu/3ayX).
